PROFESSIONAL SUMMARY

Highly analytical B.Tech Computer Science & Engineering (Artificial Intelligence) 2026 graduate with a 5-Star HackerRank rating in Python and Problem Solving. Specializing in rapid prototyping of Generative AI applications, API orchestration, and structured JSON data handling. Proven capability in leveraging Python notebooks to build, optimize, and test automated software workflows, chatbot pipelines, and custom prompt libraries. Peer-reviewed international journal author with a strong foundation in backend logic, database optimization, and end-to-end data pipelines.

EDUCATION

B.Tech — Computer Science & Engineering (Artificial Intelligence) - Graduated 2023 – 2026

Pragati Engineering College, Surampalem, Andhra Pradesh

CGPA : 8 / 10

Diploma — Electronics & Communication Engineering - Graduated

2020 – 2023

B.V.C. Engineering College, Rajhamundry, Andhra Pradesh

Percentage : 89.49%

Class X — General

2019 - 2020

S.S.B.Z.P.P. High School, Mandapeta, Andhra Pradesh - Graduated

GPA : 10 / 10

TECHNICAL SKILLS

- **Languages & Databases:** Python(Advanced),java, SQL (Query Optimization)
- **Data & Frameworks :** RESTAPIs, Flask
- **Web Technologies:** HTML,CSS,Java Script
- **Machine learning & Ai :** Generative Ai tools, Algorithmic logic , computer vision , Pandas , Scikit learn ,Data Pre Processing,ML Models , Feature extraction ,Prompt Engineering,Anomaly detection, Failure prediction concepts
- **Tools & Platforms:**GitHub, VS Code, Jupyter Notebook, Google Colab, AWS cloud foundations, Windows OS
- **Core Concepts:** Object-Oriented Programming (OOP), Testing Concepts(security,Performance),Devops Concepts ,API s,Data Structures & Algorithms (DSA) ,Exploratory Data Analysis, MS Office Suite,Multiprocessing, threading concepts, OS Concepts, Json ,LLMs, Data concepts,Analytics & debugging skills ,Reading error Logs SDLC and Agile Methodologies ,Linux basics.

PROJECTS

Multimodal VQA System using BLIP-2 | *Python, Flask, AngularJS , Cloud Flare Tunne* [IJARESM](#) 2025 – 26

- Co-developed an end-to-end data processing pipeline utilizing specialized computer vision and NLP architectures (BLIP-2) to ingest, clean, and route high-throughput visual-textual data payloads..
- Interpreted statistical variations across data loads and integrated a stateful module to maintain data consistency over multi-turn interactions.
- Optimized pipeline transmission efficiency to secure a 3–10s execution loop; technical results and methodologies were peer-reviewed and published in the international journal IJARESM.

Movie Recommendation System | *Python, Pandas, Scikit-learn, NLTK*

2025

- Built an automated data ingestion and engineering pipeline to analyze and interpret statistical data from the MovieLens-100K dataset.
- Content-based filtering engine using TF-IDF vectorization and cosine similarity on MovieLens-100K (100K ratings, 1,682 movies); NLTK preprocessing (stop-word removal, stemming) — achieved ~78% precision@10.

Handwritten Digit Classifier | *Python, TensorFlow, Keras, Matplotlib*

2025

- Programmed a modular 3-layer convolutional network for processing large-scale feature sets consisting of 70,000 data samples.
- Evaluated algorithm performance under rigorous conditions using confusion matrices, tracking validation metrics to eliminate variance bottlenecks.
- Implemented batch normalization and dropout layers to stabilize processing and achieve a 90.1% baseline testing accuracy.

Developer Portfolio Website | *HTML5, CSS3, JavaScript, GitHub Pages*

2025

- Responsive SPA with smooth-scroll navigation, animated project cards, and CSS Flexbox/Grid; deployed on GitHub Pages with cross-browser compatibility.

RESEARCH PUBLICATION

Chinta Durga Siva Manikanta Reddy et al., “A Comparative Study of Multimodal LLM for Visual Question Answering using Gradio Interface, leveraging the BLIP-2 Model,”

IJARESM, ISSN: 2455-6211, Vol. 14, Issue 4, April 2026 | Impact Factor: 9.175 | DOI: [IJARESM](#)

TRAINING & CERTIFICATIONS

- **AWS AI-ML Virtual Program:** Cloud-based ML workflows using AWS AI services and SageMaker.
- **Google AI-ML Virtual Internship :** Designed and optimized end-to-end M.L. pipelines using Python
- **Zscaler ZTCA:** Zero-trust network security, identity verification, and secure access architecture.
- **EDX — Java Programming:** OOP principles, exception handling, collections, and data structures.
- **Infosys Spring Board :** Testing Methodologies
- **EDX — Data Science with Python:** NumPy, Pandas, data visualization, EDA, and ML fundamentals.
- **Infosys Spring board:** Manual VS Automation Testing

ACHIEVEMENTS & EXTRACURRICULAR

- Published in UGC-certified IJARESM (IF 9.175) on Multimodal AI/VQA during final year of B.Tech — peer-reviewed, co-authored with faculty.
- HackerRank 5-Star Rating in Python & Problem Solving; active LeetCode practitioner (arrays, trees, graphs, DP).
- Competed in TCS Code Vita and Strides Technical Event at Pragati Engineering College.
- Academic Excellence: GPA 10/10 (Class X) | 89.49% (Diploma Engineering).
- Continuous Learning Mindset: Actively experimenting with cloud-native architectures, containerization concepts (Docker), and modern platform observability tools (OpenTelemetry/Grafana) to quickly bridge the gap into production infrastructure engineering.
- Delivered academic presentations on AI and Multimodal Systems as part of B.Tech coursework.
